PROFILE

CS undergraduate (3.60 CGPA, expected grad mid-2027) who ships full-stack projects end-to-end, including Voyage Vibe, a travel-planning app integrating Groq/Llama AI and the Google Maps API. Seeking a Software Engineering internship to bring that build-and-ship instinct to production systems.

EDUCATION

Bachelor of Computer Science

Management & Science University (MSU), Shah Alam
CGPA: 3.60/4.00

Expected May – Aug 2027

Relevant Coursework: OOP, Database Systems, Software Engineering, Computer Networks, Web Development, Network & Data Security

Diploma in Game Design

Management & Science University (MSU), Shah Alam

Apr 2020 – Feb 2023

TECHNICAL SKILLS

Core: Java, Python, JavaScript, C++, SQL

Web & APIs: PHP, REST APIs, WordPress, Google Maps API, AI API Integration (Groq/Llama)

Data: MySQL, Database Design & Normalization

Tools: Git/GitHub, VS Code, Unreal Engine 5

PROJECTS

Smart Travel Management System — Voyage Vibe

PHP, JavaScript, MySQL, WordPress, REST APIs, AI API Integration, Google Maps API, Git/GitHub

- Built a responsive travel-planning web application using PHP, JavaScript and MySQL, with WordPress and Elementor powering the front end
- Integrated an AI API (Groq/Llama) via REST endpoints to generate personalized itineraries based on destination, budget, duration and travel preferences
- Implemented interactive route planning and mapping using the Google Maps API, and designed the MySQL schema to store user itineraries and trip data
- Tested and debugged front-end functionality and API integrations across devices; used Git/GitHub for version control throughout development

Java-Based Inventory Management System

Java, MySQL, Object-Oriented Programming

- Developed a desktop inventory management system in Java using OOP design and a normalized MySQL database schema for inventory tracking

Client-Server Applications

Java, TCP/IP, MySQL

- Developed client-server applications in Java to demonstrate socket-based network communication
- Implemented server-client communication over TCP/IP with MySQL database connectivity

3D Game Development — Final Year Project (Diploma)

Unreal Engine 5, C++, Blueprints

- Developed a 3D game using Unreal Engine 5, combining C++ and Blueprints for gameplay systems and interactive UI
- Optimized rendering performance for mid-range hardware and presented the project at a university exhibition to academic staff and industry representatives

EXPERIENCE

Graphic Designer, Social Media Coordinator & IT Support

Advance Group (AIA)

Mar 2023 – Oct 2024

- Supported a fleet of 10–30 end-user workstations, resolving hardware/software issues and standardizing Windows-based configurations to reduce recurring support tickets
- Designed digital marketing assets across 10+ campaigns, lifting click-through rates by 10% through iterative A/B testing of creative variants
- Grew social media engagement by 10–25% by planning and executing targeted content strategy across platforms

eCommerce Sales Associate

HUUMANKIND

2020 – 2022

- Delivered personalized product recommendations and customer service to support sales targets, and assisted with merchandising and promotional campaigns
